

Product description

What is BP-ER:

BP-ER Emergency Food Ration is a ready-to-eat food of high nutritional value. The optimal logistical properties secure an easy, safe and efficient transportation, distribution, usage and storage under extreme conditions.

As a compressed food, BP-ER contains a high ratio of balanced nutrition compared to volume.

- ➔ A 20' container holds 36,000 units of BP-ER representing a minimum level of nutrient supply for 10,000 adults for one week.

How to eat:

BP-ER, Emergency Food can be eaten as a bar straight from the package, or crumbled into water and eaten as porridge. To make porridge, use 200 ml of boiling drinking water per food bar. If eaten dry, make sure drinking water is available.

Distribution:

If no other food is available, below table could be used as an approximate guideline for distribution.

Age	Bars/day	Kcal/day	Bars/week
½ – 1	3	768	21
2 – 3	4	1016	28
4 – 6	5	1270	35
7 – 8	6	1524	42
Adult (f)	8	2032	56
Adult (m)	9	2290	63

Utilisation

BP-ER Emergency Food Ration is an emergency and disaster preparedness product.

It is developed to help to prepare for any **emergency situation** or **natural disaster** such as an earthquake, tsunami, hurricane, or flood.

BP-ER can be **air dropped** from different altitudes at many occasions, also without parachute. Drops made from 600 feet without parachute show no significant damage to the product

It is not recommended to use BP-ER:

- ➔ For children below 6 months (exclusive breastfeeding until 6 months of age).

For children from 6 months to 2 years of age, it should preferably be given as porridge.

Nutritional properties

- ➔ High levels of energy easily digested and utilised.
- ➔ A combination of protein sources, which give a high and balanced content of essential amino acids.
- ➔ Low protein content to prevent use of protein as an energy source.

Food safety:

- ➔ No risk of microbiological growth due to a very low water activity in the product.
- ➔ Free from GMO materials.
- ➔ Acceptable to all creeds and cultures
- ➔ Sophisticated manufacturing process that is supervised by in house food technologists and nutritionists well equipped with both a research- and control laboratory.

Standards and regulations

- ➔ Regulation (EU) No 1169/2011 of food information to consumers.
- ➔ The product is manufactured, packaged and labelled according to relevant Codex alimentarius standards.
- ➔ Halal approved.

LOGISTICAL PROPERTIES

The BP-ER unit is packed under high vacuum in an air- and watertight aluminium foil bag made of tri-ply laminate. A water-repellent cardboard box protects this bag. Twenty-four units are packed into a strong corrugated board carton, securing the food quality under the most extreme conditions during transport and storage (moisture, mechanical stress, heat, insects, and rodents).

BP-ER UNIT "BREAKDOWN"

	Food Tablet (s)	BP-ER Unit (s)	Carton (s)	Net Weight	Kcal
1 x Food tablet	1			27.8 g	135
1 x Food bar	2			55.6 g	270
1 x BP-5 Unit	18	1		500 g	2 432
1 x Carton	432	24	1	12 kg	
1 x Pallet		1 320	55	660 kg	
1 x 20' container		36,000	1,500	18,000 kg	

Limitations:
